

PULKIT GAUTAM

RogueX -- Cybersecurity Student & Builder

hello@rogueX.dev | github.com/rogueX | linkedin.com/in/pulkit-gautam

PROFILE

Cybersecurity student focused on offensive security, recon automation, and web exploitation. Builds and ships small, sharp security tooling in public.

EXPERIENCE

Web & Recon Lead -- Campus Cybersecurity Club

2024 - Present | Runs monthly internal CTFs, mentors juniors.

Security Intern -- Local MSP (contract)

Summer 2024 | Vulnerability assessments and remediation reports.

SELECTED PROJECTS

ShadowMap -- Attack-surface recon rendered as an interactive graph.

Cerberus -- Anomaly-detecting WAF reverse proxy written in Go.

KeySeer -- Entropy-aware secret scanner for git pre-commit hooks.

CERTIFICATIONS

eJPT -- Junior Penetration Tester (INE Security), 2025

CompTIA Security+, 2024

PortSwigger Web Security Academy -- Practitioner, 2023

EDUCATION

B.Tech, Computer Science -- Cybersecurity Track

University Institute of Technology, 2023 - Present
